

Every student needs a laptop for learning at Craigieburn. You can buy a school-approved device through our supplier portal, or supply your own if it meets our requirements.

Why buy through the school provided supplier portal

Accidental damage is covered. Drops, bumps, liquid spills, cracked screens and electrical surge are all included in the warranty — with no excess to pay.

We handle the repairs. Our ICT team lodges the claim for you. There's no manufacturer to call and nothing to post — a technician comes to the school.

A loan laptop while yours is repaired, so your child won't go without a device.

Three-year warranty as standard on every device, with a four-year option available.

Ready on day one. All devices are delivered directly to the College, so our ICT team can set them up and label them before your child collects theirs.

Software at no extra cost

Microsoft 365

Word, Excel, PowerPoint, Outlook, Teams, OneDrive

Windows 11 Education licence

Adobe Creative Cloud

Free for all Victorian government secondary students

Compass

Setting up the device

Before handover, our ICT team rebuilds each device with the College's Standard Operating Environment — a school-configured version of Windows.

It arrives connected to our network and printers, with school software installed and content filtering in place.

The rebuild erases everything on the device, so back up your files first if you're supplying your own. Devices bought through the portal arrive new.

Can't purchase a device? Lease one from the College

If buying a device isn't right for your family, the College offers a leased laptop. Leased devices are set up with the same school build and software, and repairs are handled by our ICT team in the same way. Contact us to arrange one.

\$300

per year

Charge it overnight

Devices must arrive fully charged each morning. A full charge lasts the school day, and students can't charge during class time.

Carry it safely

A protective case is essential. Report any damage to ICT promptly so we can lodge a repair.

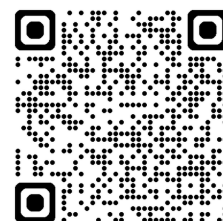

We'll label it

The College labels each device with your child's name at handover — you don't need to do this yourself.
